BILLING / SPEND ALERTS

Performance Monitoring

Protects against vulnerabilities in container images and registries throughout the application lifecycle. Integrations with Kubernetes environments continuously monitor risk posture and activity for new and evolving threats.

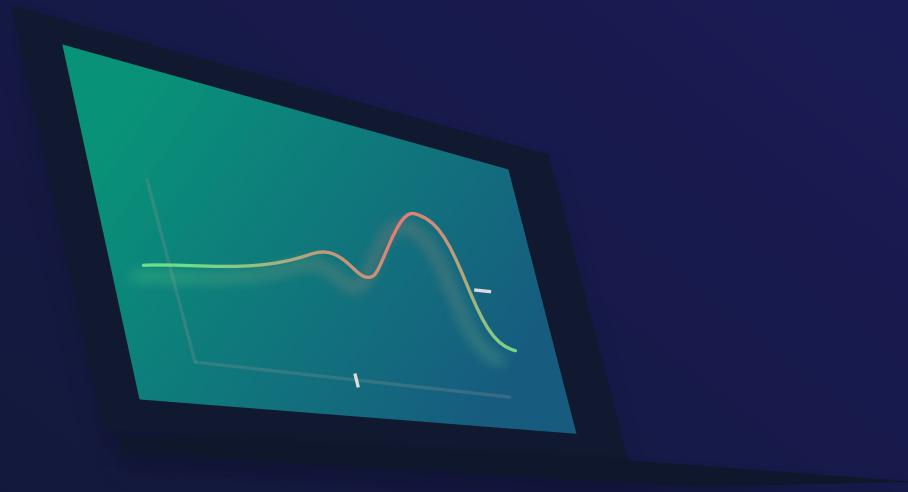

Consolidated Tooling

In many organizations, technical teams operate their own separate systems to monitor the services or infrastructure they manage.

Are you paying for multiple tools? Do you have teams running multiple tools in silos? Are you looking to consolidate multiple tools, and optimize Datadog features in your organization?

Observian can help you extract the most value from the platform

Cost Optimization & Monitoring

Do you have monthly overages with your Datadog spend? Are you tired of bill ambiguity and confusion? Observian can help with cost optimization.

After a thirty minute Datadog cost optimization review, we'll be able to share how much we can save.

Optimize your Datadog spend and get managed protection and response.

Schedule a **FREE** Datadog cost optimization review and assessment.
